

DNA barcoding check list

The foll	owing s	teps must be carried out before taking a sample for DNA testing
	☐ Photos of the mushroom taken in the field	
	0	With sample number
	0	And ruler
	Sample	collected in accordance to the sampling protocol
	Sample collection sheet filled out	
	Photos documenting fungi's major features taken	
		With sample number
	0	May be taken in the field or later during workup
	Approp	priate sample description sheet filled out
	Mushroom prepared for drying into a voucher	
The foll	owing s	teps are optional but it makes the sample more valuable is they have been performed:
	Spore p	orint taken (where possible)
	0	Sample number on spore print card
	☐ Chemical testing	
	0	Iron Salts
	0	Potassium hydroxide
	0	Ammonia
	Spores checked under microscope	
	0	For shape and size
	0	Spores stained
	0	Images of spores
If the sa	ample m	neets the above requirements then you can sample the DNA
	Sample of mushroom applied to FTA plant saver card as per DNA sampling protocol	
	Specim	ens prepared as a voucher as per the voucher preparation protocol
The vou	ıcher, F	TA cards and documentation should be returned to Richard Jacob for submitting to DNA
